PRODUCT OVERVIEW

One system for trading businesses

Quantro ERP is a **cloud-based, subscription-driven ERP solution** designed to simplify and organize everyday operations. Built around practical, connected workflows, it serves trading and distribution businesses that need **dependable document control, clear reporting and easy-to-use processes** — without unnecessary complexity.

⊗ The challenge

- ⊗ Business data scattered across spreadsheets and standalone tools
- ⊗ The same information re-keyed by sales, stores and accounts
- ⊗ Limited up-to-date view of stock, receivables and payables
- ⊗ Documents hard to trace from enquiry through to invoice
- ⊗ Software tied to a single office computer

✓ The Quantro ERP approach

- ✓ One centralized platform for every core business function
- ✓ Each document is created from the previous one — no re-entry
- ✓ Dashboards for sales, purchases, receivables, payables and P&L
- ✓ Linked documents give full traceability across the cycle
- ✓ Cloud access from any supported browser, wherever you work

Key benefits

Centralized control

Manage key business activities from one platform instead of disconnected tools.

Complete document control

Connected documents from enquiry and quotation through order, delivery and invoicing.

Better visibility

A clearer view of sales, purchases, inventory, receivables, payables and financials.

Accurate processing

Structured workflows help teams follow consistent processes and reduce manual errors.

Controlled user access

User management, roles and permissions keep every user to the right information.

Simple to use

Built around practical trading workflows — powerful where it matters, simple elsewhere.

Access from anywhere

Work on PC, laptop or MacBook through Chrome, Safari or Edge.

Scales with you

Add modules and features on demand as the business grows.

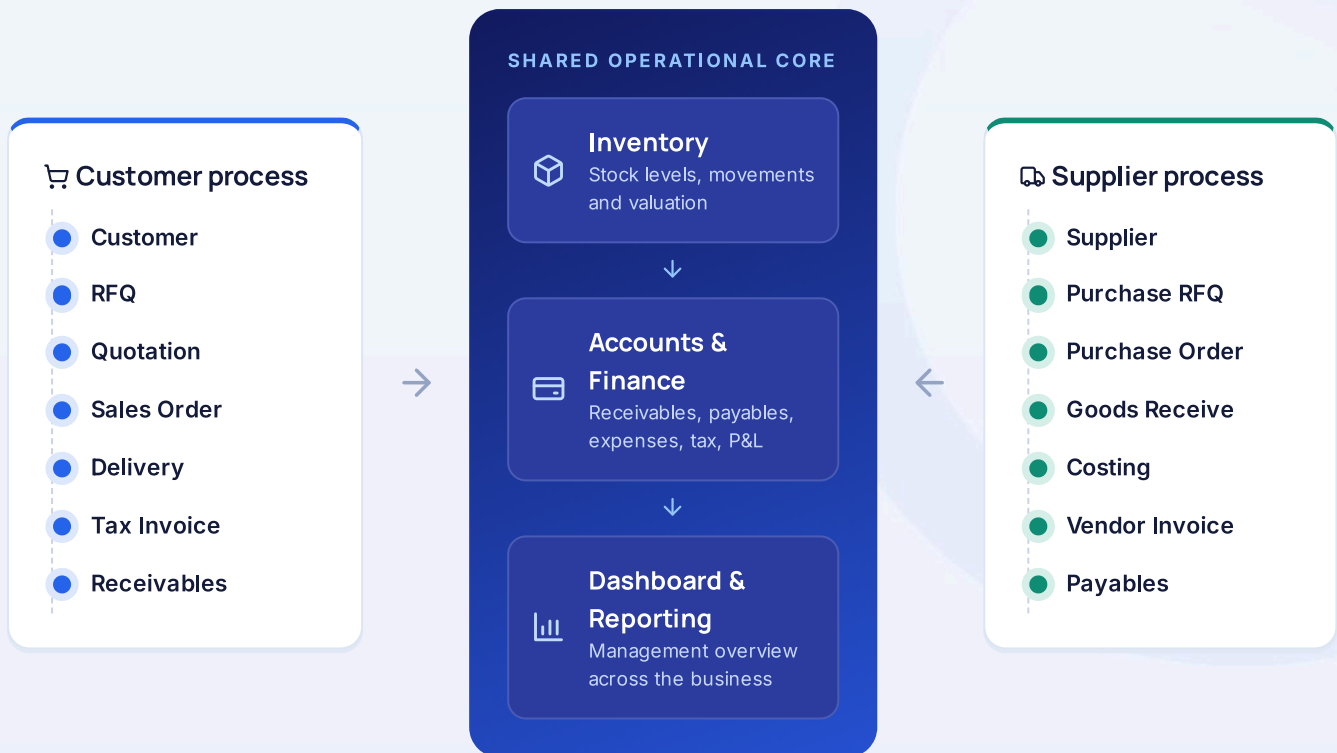

Local support

Customers in Oman are supported through a local distribution and support network.

CONNECTED WORKFLOWS

How Quantro ERP works

Customer and supplier activity flows into a shared operational core. **Every transaction updates stock, accounts and reports** — giving management a connected, accurate view of the business as it happens.

PLATFORM SERVICES — AVAILABLE ACROSS EVERY PROCESS

HR Management

Warranty Management

Document Management

System & Support

End-to-end document traceability

Each business document is created from the one before it, so **any invoice can be traced back to its originating enquiry** — and any purchase back to its supplier request.

SALES RFQ → Quotation → Sales Order → Proforma Invoice → Delivery Note → Tax Invoice → Sales Return

PURCHASE Purchase RFQ → Purchase Order → Goods Receive → Costing → Vendor Invoice → Purchase Return

2

Connected core processes

3

Shared core modules

Unified management view

MODULE REFERENCE · 1 OF 2

Core trading modules

The operational backbone of Quantro ERP — **every document created here feeds stock and accounts.**

MODULE 01

Sales Management

Manage the complete sales cycle, from customer enquiry through invoicing and returns.

RFQ	Record customer enquiries and requirements	Quotation	Prepare professional, priced quotations
Sales Order	Convert accepted quotations into orders	Proforma Invoice	Issue advance invoices ahead of delivery
Delivery Note	Document goods dispatched against orders	Tax Invoice	Issue tax invoices linked to deliveries
Sales Return	Process returns against the original invoice	Customer Records	Central history of every customer transaction

WORKFLOW RFQ → Quotation → Sales Order → Delivery → Invoice → Return

MODULE 02

Purchase Management

Control purchasing from supplier enquiry through receiving and invoice processing.

Purchase RFQ	Request and compare supplier prices	Purchase Order	Issue orders to selected suppliers
Goods Receive	Record receipts against purchase orders	Costing	Allocate costs for accurate item valuation
Vendor Invoice	Book supplier invoices into payables	Purchase Return	Return goods with full document reference

WORKFLOW RFQ → PO → Goods Receive → Costing → Vendor Invoice → Return

MODULE 03

Inventory Management

Visibility and control over stock movements, valuation and status.

Product Master	Single, central catalogue of items	Goods Receive	Stock-in linked directly to purchasing
Stock Adjustment	Controlled corrections for counts or damage	Stock History	Complete movement history for each item
Costing	Stock valuation based on purchase costs	Stock Tracking	Up-to-date stock visibility across the business

WORKFLOW Receive → Store → Adjust → Deliver → Value

MODULE REFERENCE · 2 OF 2

Finance, people & platform modules

Financial visibility, management reporting, HR and the platform services that keep Quantro ERP organized, secure and easy to manage.

MODULE 04

Accounts & Finance

Practical financial visibility for everyday business operations.

- ✓ Receivables — customer balances and collections
- ✓ Payables — supplier balances and payments
- ✓ Expenses — record and categorize business costs
- ✓ Tax — tax amounts captured on transactions
- ✓ Profit & Loss — business performance at a glance
- ✓ Cash position — understand available funds

MODULE 05

Dashboard & Reporting

A clear overview of the information management needs most.

- ✓ Sales overview
- ✓ Purchase overview
- ✓ Receivables summary
- ✓ Payables summary
- ✓ Profit & Loss reporting
- ✓ Inventory and stock history views

MODULE 06

HR Management

Manage essential employee and HR processes from one system.

- ✓ Employee management and profiles
- ✓ Interview management
- ✓ Attendance and leave management
- ✓ Payroll processing
- ✓ Roles & permissions
- ✓ Employee exit and records

MODULE 07

Warranty Management

Warranty information linked to sold products and customer invoices.

- ✓ Warranty cards for sold items
- ✓ Warranty period definition
- ✓ Linking to the original customer invoice
- ✓ Warranty tracking and status

MODULE 08

Document Management

Organize business records and supporting documents.

- ✓ Organized business records
- ✓ Easy reference and retrieval
- ✓ Traceability across connected documents
- ✓ Professional, consistent document output

MODULE 09

System & Support

Capabilities that keep the platform secure and easy to manage.

- ✓ User management
- ✓ Roles & permissions
- ✓ System notifications
- ✓ System masters and configuration

Need something that isn't listed?

Quantro ERP can be configured to each client's requirements, and additional modules and features can be developed and added on demand as the business grows.

SPECIFICATIONS

Sales & Purchasing Operations

Inventory-Intensive Businesses

Businesses Moving to Cloud ERP

What each team gains

Every role sees the information that matters to them — all from the same connected data.

TEAM	WHAT THEY SEE AND MANAGE	PRIMARY MODULES
 Management	Business overview, reports, financial visibility, sales and purchase monitoring	Dashboard · Finance
 Sales	Customer records, quotations, orders, deliveries and invoices	Sales · Warranty
 Purchasing	Supplier management, purchase orders, receiving and costing	Purchase · Inventory
 Stores & Inventory	Stock visibility, stock movement and stock tracking	Inventory
 Finance	Receivables, payables, expenses, tax, profit & loss and cash position	Accounts & Finance
 HR	Employee records, attendance, leave and payroll	HR Management

One source of truth

Because every module shares the same underlying data, sales, stores, finance and management always work from the same up-to-date figures.

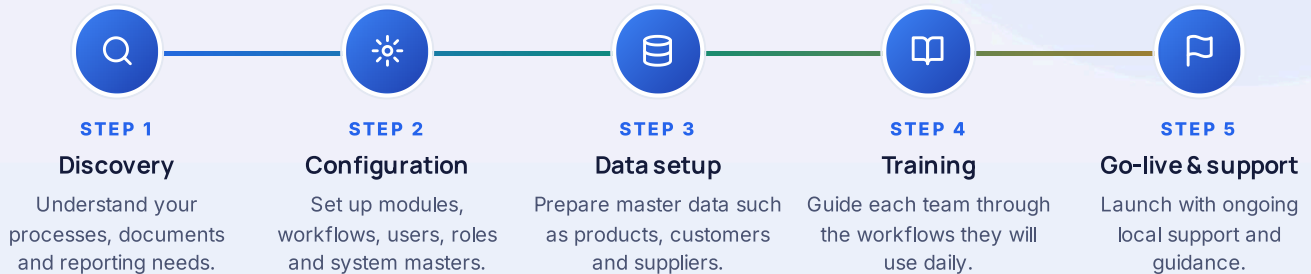

FLEXIBILITY & DELIVERY

Customization & implementation

Quantro ERP flexes around each business — from **configuring standard modules** to a **complete custom build** — backed by local support.
